

Learnie Cohort Web Services

Cohort API Key is needed for cohort web services operations, it could be found for each cohort on cohort config area which is accessed by this icon: . Then the administrator can click on the “ <> “ icon in the cohort admin section.

Users are added and deleted from Cohorts simply by adding or removing their email from the list of cohort members.

Once a user is removed from the cohort, their content will stay as part of that cohort. It will be resigned to them if they are readded back into the cohort.

Add email to Cohort *(POST Method)*

API Endpoint:

```
https://us-centrall1-learnie-1050a.cloudfunctions.net/addemailtochoort
```

```
Params:    <String, String>{
            'email': {email},
            'apikey': {apikey}
          }
```

Api Response: `String 'success'` if a success operation is done, if not error detail.

Remove email to Cohort *(POST Method)*

API Endpoint:

```
https://us-centrall1-learnie-1050a.cloudfunctions.net/deleteemailtochoort
```

```
Params:    <String, String>{
            'email': {email},
            'apikey': {apikey}
          }
```

Api Response: `String 'success'` if a success operation is done, if not error detail.
